

| | |
|--|----|
| Executive summary..... | 7 |
| Chapter 1: GIS and its uses in Historical Research. | 8 |
| 1.1 Introduction..... | 8 |
| 1.2 The terminology of GIS..... | 8 |
| 1.3 Uses of GIS..... | 11 |
| 1.4 Problems with GIS..... | 13 |
| 1.5 The GIS learning curve..... | 14 |
| 1.6 Conclusions..... | 15 |
| Chapter 2: The World as Viewed through a GIS..... | 18 |
| 2.1 Introduction..... | 18 |
| 2.2 Attribute data..... | 20 |
| 2.3 Vector systems..... | 22 |
| 2.4 Raster systems..... | 24 |
| 2.5 Other systems: terrain modelling with TINs..... | 26 |
| 2.6 Bringing it all together with layers..... | 27 |
| 2.7 Conclusions..... | 28 |
| Chapter 3: Acquiring Spatial Data..... | 33 |
| 3.1 Introduction..... | 33 |
| 3.2 Scanning maps to produce raster data..... | 34 |
| 3.3 Digitising maps to produce vector data..... | 34 |
| 3.4 Geo-referencing..... | 35 |
| 3.5 Error and accuracy..... | 37 |
| 3.6 Digitising attribute data..... | 38 |
| 3.7 Raster-to-vector and vector-to-raster data conversion..... | 38 |
| 3.8 Primary data sources..... | 38 |
| 3.9 Buying data or acquiring it free..... | 39 |
| 3.10 Conclusions..... | 40 |
| Chapter 4: Basic GIS Functionality: querying, integrating and manipulating spatial data | 46 |
| 4.1 Introduction..... | 46 |
| 4.2 Querying data..... | 46 |
| 4.3 Manipulating and measuring spatial data..... | 47 |
| 4.4 Buffering, Thiessen polygons and dissolving..... | 48 |
| 4.5 Bringing data together to acquire knowledge..... | 50 |
| 4.6 Formally integrating data through overlay..... | 51 |
| 4.7 Integrating incompatible polygon data through areal interpolation..... | 56 |
| 4.8 Conclusions: information from spatially detailed, integrated databases..... | 59 |
| Chapter 5: Time in Historical GIS..... | 62 |
| 5.1 Introduction..... | 62 |
| 5.2 The need for understanding through space and time..... | 62 |
| 5.3 Time in GIS..... | 63 |
| 5.4 Methods of handling time in historical GIS..... | 64 |
| 5.5 Conclusions..... | 67 |
| Chapter 6: Visualisation from GIS..... | 71 |

| | |
|---|-----|
| 6.1 Introduction..... | 71 |
| 6.2 Mapping and cartography in historical research..... | 71 |
| 6.3 Developing understanding from basic mapping through GIS | 73 |
| 6.4 Producing atlases from GIS | 74 |
| 6.5 Electronic visualisation from GIS..... | 75 |
| 6.6 Other forms of mapping..... | 75 |
| 6.7 Moving and interactive imagery | 76 |
| 6.8 Conclusions..... | 78 |
| Chapter 7: Spatial Analyses of Statistical Data in GIS..... | 83 |
| 7.1 Introduction..... | 83 |
| 7.2 What makes spatially referenced data special?..... | 84 |
| 7.3 Spatial analysis techniques | 86 |
| 7.4 Spatial analysis in historical GIS | 88 |
| 7.5 Conclusions..... | 90 |
| Chapter 8: Qualitative Data in GIS..... | 95 |
| 8.1 Introduction..... | 95 |
| 8.2 Types of qualitative data in GIS | 95 |
| 8.3 Case studies..... | 96 |
| 8.4 Conclusions..... | 98 |
| Chapter 9: Conclusions | 88 |
| Chapter 10: Glossary..... | 102 |

Throughout the text terms given in *italics* are those that are defined in the glossary.
